

SHOCKWAVE PRO 7.1 SSE
QUICK START GUIDE
 Follow **1** **2** **3** to set up your soundbar

Use our **“Perfect Device Matching Tool”** to create a custom setup guide based on your TV and devices. Scan QR code or visit bit.ly/device-matching-tool

A HUGE THANKS

Your support allows us to continue pursuing our dream of disrupting the future of home audio. We hope this investment brings much joy and excitement to all of your entertainment needs. Pump up the BASS!

RAYMAN CHENG, CEO of  Nakamichi®

1 BEST CONNECTIONS

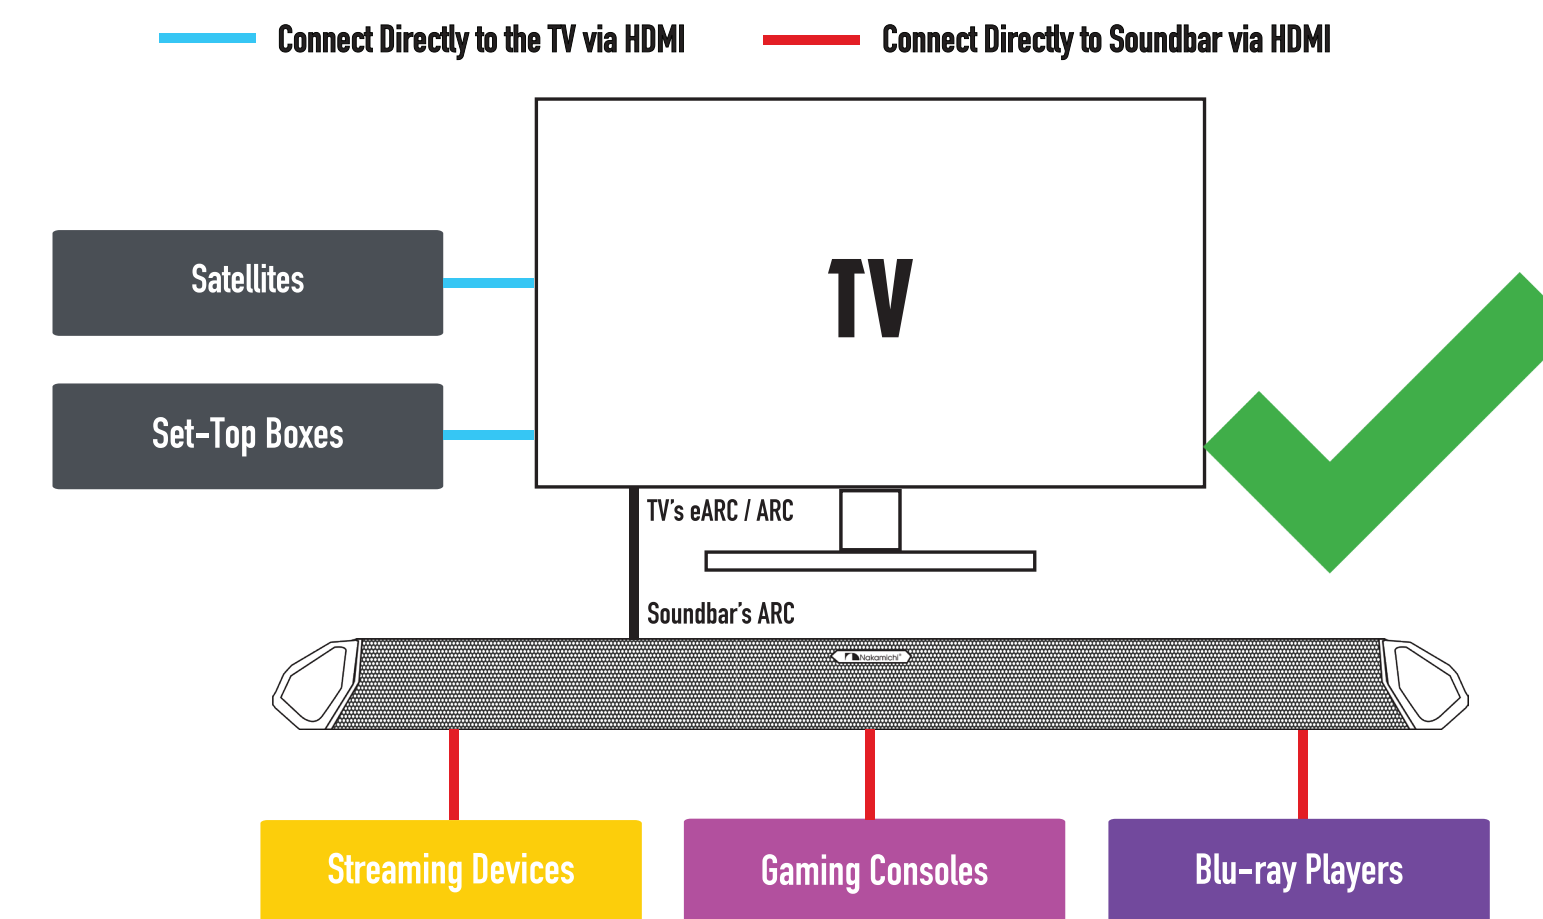

Always use HDMI 2.0 High Speed Cable or Optical Cable for best audio quality

2 BEST SETUP

Use our **“Perfect Device Matching Tool”** to create a custom setup guide based on your TV and devices. Scan QR code or visit bit.ly/device-matching-tool

IMPORTANT: Before connecting your new soundbar, unplug TV and all source devices from the AC wall socket for 5 minutes to establish a clean HDMI handshake between devices

3 BEST SURROUND

Scan QR code to view expanded remote control guide or visit bit.ly/71-shockwave-remote

All Channel Stereo / Stereo Only:
 ALL CHANNEL STEREO = Enables Stereo playback on surround speakers. Best for music, YouTube™ by boosting volume level of surround speakers.

STEREO Only = Enables playback with Soundbar + Subwoofer only (no audio from Surround Speakers)

For Dolby / PCM audio:
 DOLBY SURR = Dolby All-Channel Surround + Height (Video Content Default)
 DOLBY UPMIX = Dolby All-Channel Surround Upmix
 NATIVE = Playback based on original surround format encoded for source material

For DTS encoded content only. Cannot enable when Dolby or PCM content is playing:
 NEURAL X = DTS All-Channel Surround Sound Upmix

Use the DIRECT or STEREO button to toggle between the various surround modes for your desired experience

1A SOUNDBAR & SUBWOOFER PLACEMENT

Recommended speaker placement with optimal distance. Actual distance may vary based on room layout.

1B SURROUND SPEAKER PLACEMENT

The bottom speaker driver of the surround speakers should be at ear level for optimal performance.

Recommended speaker stands, scan QR code or visit: bit.ly/71-speaker-stands

NOTE: Illustration is not to scale. Speaker stands are not included.

2 CONNECTING SURROUND SPEAKERS TO SUBWOOFER

Connect surround speakers to the ports on the back panel of subwoofer

3 TURNING ON YOUR TV & SOUNDBAR

Blinking Blue Light: Subwoofer is in pairing mode.

Blue Light Stays On: Subwoofer successfully paired.

Note: Once soundbar is powered off, the subwoofer will go into standby mode. The blinking blue light behind the sub will turn off after 10 minutes.

4 CONNECTING TO YOUR TV

Is the HDMI port on your TV labeled ARC?

5 SETTING UP HDMI ARC / CEC

To ensure device stability, perform a HDMI connection refresh between all devices:

- While all devices are on, **disconnect all HDMI cables** connected to TV and existing sound system
- Power OFF** TV and all source devices
- Unplug all devices** from the AC outlets
- Wait for 5 minutes** before plugging TV, new Shockwave soundbar and source devices back to the AC outlets
- Power ON** the soundbar, TV and all source devices
- While they are on, **connect the TV and soundbar via HDMI ARC**. To find the **optimal ARC/CEC settings** for your TV, please scan the QR code below or visit the link: bit.ly/hdmi-cec-settings

- Once the **HDMI ARC/CEC connection** is established between your TV and soundbar, connect the source devices one at a time. Use **Perfect Device Matching Tool** on top of this page to create a customized setup guide based on your devices

Note: HDMI ARC/CEC can only be enabled if your TV has a HDMI input labeled HDMI ARC.

6 LISTENING TO YOUR SOUNDBAR

Press to power on/off the soundbar.

Important Tip

Once HDMI-ARC/CEC is set up, always power on the soundbar by using your TV or content device's remote control power ON button. Always use your TV's / content device's remote control to power OFF the system.

For more about HDMI-ARC/CEC, visit: nakamichi-usa.com/what-is-hdmi-cec/

STEREO S All Channel Stereo / Stereo Only
ALL CHANNEL STEREO = Enables Stereo playback on surround speakers. Best for music, YouTube™ by boosting volume level of surround speakers.
STEREO ONLY = Enables playback with Soundbar + Subwoofer only (no audio from Surround Speakers)

SETUP Access to advanced system settings. (Button only works when soundbar is in any HDMI (ARC/CEC) mode, see user manual for more information)

For expanded remote control guide, scan QR code or visit: bit.ly/71-shockwave-remote

HDMI ARC **HDMI 2** **HDMI 3**
HDMI 4 **OPT** **COAX**

Press HDMI button to play TV audio. Press HDMI 2/3/4/Optical/Coaxial button to play content from other devices.

DIRECT D Set DIRECT to recommended settings below for best surround.
Did You Know?

DOLBY SURR = Dolby All-Channel Surround + Height (Video Content Default)
DOLBY UPMIX = Dolby All-Channel Surround Uplink
NATIVE = Playback based on original surround format encoded for source material

For DTS encoded content only. Cannot enable when Dolby or PCM content is playing
NEURAL X = DTS All-Channel Surround Sound Uplink

MENU Access to firmware upgrade and wireless subwoofer(s) pairing. (Button only works when soundbar is in USB mode)

INFO Press INFO button to see the source audio format on the soundbar's LED display.
DOLBY DIGITAL, DOLBY DIGITAL PLUS, DOLBY DIGITAL PLUS (Dolby Digital Plus), DTS X, DTS or PCM 2D (Refer to user manual for complete list of audio formats supported)

7 TROUBLESHOOTING

A HDMI ARC/CEC - No sound or video:

Performing a **Soundbar Soft Reset** can restore the soundbar settings back to factory default and refresh HDMI settings. If your TV's connected to another sound system via HDMI previously, perform a **Soundbar & TV Hard Reset + HDMI Connection Refresh** to establish a new HDMI handshake.

Soundbar Soft Reset:

- Switch to **HDMI ARC input**
- Press **SETUP** button multiple times to locate **RESET function**
- Press **ENTER** button to select the function
- Press **ENTER** button again to confirm **RESET function**
- The soundbar will **restart automatically** to complete the reset sequence. ("HELLO" appears on soundbar LED and it will be back to ARC mode by default)

Soundbar & TV Hard Reset + HDMI Connection Refresh:

- While all source devices are on, **disconnect all HDMI cables** connected to TV and soundbar as well as TV to soundbar
- Power OFF** TV, soundbar and all source devices
- Unplug all devices** from the AC outlets
- Wait for 5 minutes** before plugging the TV, soundbar and source devices back to the AC outlets
- Power ON** the soundbar, TV and all source devices
- While they are on, **connect the TV and soundbar via HDMI ARC**. Once the connection is established, connect the source devices one at a time. Use **Perfect Device Matching Tool** on top of this page to create a customized setup guide based on your source devices

B Subwoofer or Surround Speakers Cut Out / Cracking / Popping:

Enable dedicated frequency communication between the soundbar and the subwoofer + rear speakers (*Available on FW34 firmware only)

- Switch soundbar to any **HDMI input**
- Press the **SETUP** button on the remote a few times until soundbar LED displays "D FRQ"
- Use the **LEFT** or **RIGHT** arrow to select "DF ON"
- Press **ENTER** on the remote

If you are still having issues with your subwoofers, scan the QR code on the right or visit: bit.ly/71-subwoofer-audio-distortion For other subwoofer related issues, refer to "7.1 Subwoofer FAQ Page" on right for more info.

* To check for firmware version, press **INFO** button on the remote control multiple times until you see FWXX on the soundbar front LED panel

C Soundbar Intermittent Cut Out or No Sound:

- Perform a soft reset on the soundbar with the following steps:
- Switch to **HDMI ARC input**, press the **MOVIE** button on the remote
 - Press the **SETUP** button
 - Toggle and select "RESET"
 - Press **ENTER** button
 - Disconnect the source device** that is having issues from the soundbar or TV. **Unplug the source device** from the AC outlet for **5 minutes** before powering it back on
 - While the **source device is on**, connect it to the soundbar or TV. Use **Perfect Device Matching Tool** on top of this page to create a customized setup guide based on your device
 - Get the best performance using the recommended **AUDIO*+VIDEO**** settings using the links below:
* For audio settings, visit: bit.ly/audio-settings ** For video settings, visit: bit.ly/video-settings

1 The Soundbar or the Subwoofer Does Not Power On:

Please contact support@nakamichi-usa.com so we can work on a replacement (within 30 days of purchase). The system comes with a **1 year parts and labor warranty**.

2 No Sound from Surround Speakers

Press the "DIRECT" or "STEREO" buttons on the remote to enable, Dolby Surround, Dolby Uplink or All Channel Stereo to get sound from all speakers.

3 Low Volume from Surround Speakers

Press the "STEREO" button on the remote to enable All Channel Stereo for maximum surround speakers output. Best for YouTube™ and music.
